

Psychometric Profiling

If you are undertaking a program or a coaching package with LV, talk to us about adding a psychometric assessment. We offer a range of in-house psychometric profiling, 360 Degree Assessment and other feedback services to assist and support your leadership development as part of our programs or coaching packages. We work with you to determine the most appropriate instrument to meet the objectives of your self, your team's or your organisation's requirements.

Psychometric instruments are available in the areas of:

Leadership Capabilities	360 Degree Feedback	Team Development
Change Management	Emotional Intelligence	Conflict Management
Personality Types	Stress Management	

We use online administration and reporting of our psychometric instruments so we can source products globally, passing on considerable cost saving to you.

Leadership Victoria is a not for profit organisation and social enterprise. Our psychometric instrument administration and reporting is provided to you at cost including discounted rate for not for profit organisations. 100% of the proceeds of our activities support our scholarships for leadership programs and our pro-bono collective impact programs.
